MEMORANDUM FOR: Chief, Headquarters Engineering Branch/RECD/OL
FROM :
Director, Consolidated SAFE Project Office/ODP
SUBJECT : 400 Hz UPS for Project SAFE
REFERENCE : Your Memo for D/CSPO/ODP, dated 4 Sept 1981,
Subject: 400 Hz UPS for Project SAFE

1. It is requested that you accept Emerson Electric's offer of \$102,594 to buy back the electronics of the 400 HZ UPS ordered for Project SAFE.

2. We have been unsuccessful in our pursuit of a more advantageous price. Apparently we will have to absorb as a loss the cost (\$35,000) of the associated batteries.

3. It is requested that another quarterly review of Project SAFE's renovation activities and cost be scheduled. Please call me on extension to establish the time.

MEMORANDUM FOR THE RECORD

25X1 FROM : [REDACTED]
Chief, Systems Analysis Staff

SUBJECT : Installation of SAFE Terminals in [REDACTED] Building

25X1

REFERENCES: (a) Memo dtd 25 June 81 to DD/NFAC fr D/OCR subj.
Allocation of SAFE Terminals in Block 1
(b) Memo dtd 4 Sept 81 to D/CSPO fr C/SAS subj.
Initial Impact of NFAC Reorganization on SAFE

25X1 1. Per telecon between [REDACTED] DC/SAS and [REDACTED] Acting D/ODP, on 15 September 1981, the problem with installing SAFE terminals [REDACTED] is a near term problem, 8 to 10 weeks, and should not affect the installation of SAFE terminals in that building during the Block 1 time period. SAS, therefore, is planning to maintain the two thread concept recommended in (a) referenced memorandum and will proceed accordingly.

25X1

25X1 2. The SAFE (b) referenced memorandum regarding the requirement for the installation of 29 SAFE terminals [REDACTED] during Block 1 still applies.
